

# 2 Watt CW Test Transmitters

310-010129-001 • 310-010129-003 • 310-010129-004

## Designed to provide test frequencies in wireless bands

The 2 Watt Praxsym CW Transmitter is a complete, portable continuous wave (CW) test source. Frequency and output level can be set from the touch keys on the front panel or the LCD touchscreen display. The transmitter also contains a USB interface enabling the user to control the transmitter remotely.

The transmitter can be powered using the internal 6 AA rechargeable batteries for 1.5 hours of continuous operation or from the AC/DC wall adapter included. Recharging takes 2 hours.

- ▶ Calibrated RF output level
- ▶ Backlit LCD touchscreen display
- ▶ Use as a test source to evaluate indoor and outdoor wireless coverage

RF Output	1 Port, N-type Female
Frequency Characteristics	<b>310-010129-001</b> Frequency Range: 2495-2690 MHz Channel Spacing: 250 KHz, 1 MHz <b>310-010129-003</b> Frequency Range: 1710-2170 MHz Channel Spacing: 30 kHz, 200 kHz, 1.25 MHz <b>310-010129-004</b> Frequency Range: 698-960 MHz Channel Spacing: 10, 12.5, 30 & 200 kHz, 1.25 MHz
Output Power	+10 to +33 dBm Adjustable: 0.1 dBm
Harmonics	< -40 dBc
Temperature Range	0-50 °C
Power	AC or DC Rechargeable Batteries
Battery Operating Time	1.5 hours, Full Power
External Dimensions	7" x 5" x 3"
Weight	4 lbs
